For a Growing World**

COMMUNICATION SOLUTION FOR A GROWING WORLD

Never before the importance of sound communications it has been so great, reliable and of global course.

In Europe, as in the rest of the World, to receive and to transmit quickly information represents a necessity for the international market characterized by rapid changes.

In the global economy of today, the world of the business is not stopped never.

The sector of the computer science and that of the telecommunications is moving toward the convergence to offer new and advance solutions of communication, to make mostly the commerce and the industry efficient and competitive.

THE CHALLENGE OF COMMUNICATIONS

The success of a company depends more and more from the choice of communication' infrastructures. Competitiveness, today, it means to have continuous connections among all of your branches, between customers and suppliers 24 hours a day, 365 days per year, independently from their location.

The corporate communications have to contribute in reducing the managerial costs and to get great efficiency and productivity.

Sophisticated presently technologies make all of this possible.

Rapid and sound connections give to you the possibility to share data and information with your partners across Europe and in the rest of the World.

Nevertheless, you desire to assemble the efforts on your business, and not on your communications management; you don't desire to hock your worth and your resources in the creation and management of a telecommunications network.

And finally, as how to hold the footstep with the most recent technological developments?.

TO FIND A PARTNER FOR THE COMMUNICATIONS

The rapidity of the technological progress, represents one of the greatest challenges that the modern firms are forced to face.

Due to the above, many European multinationals have chosen to entrust to third party the management of their communications, entirely focusing on their own business.

To satisfy all your needs, your partner in the area of communications has to be able to offer a great range of integrated services. Within an environment as where firms have to give guarantee of efficiency in their Country as well in any others, the partner you selected should be also an experienced manager that operates worldwide.

JTMC SaT Telecom - High Experience in the Communications

JTMC SaT Telecom, one of the major international carrier, work in the most varied political and regulation contexts.

Standard common and culture of the excellence make us as an unique organization both to domestic and global level.

Our state-of-the art technologies are in the forefront, our experience on a domestic level and our international size allow us to offer all the competences required by the modern markets.

INTEGRATED SOLUTIONS OFFERED BY A SINGLE SUPPLIER

We have designed and we offer to our international customers a various range of products of large bandwidth of high quality for the voice and data management.

The services are conceived for satisfying your needs and managed by a single supplier to offer complete and integrated solutions.

OFFERING SERVICES THAT YOUR COMPANY NEEDS

The commercial staff, in Europe and in the world, can connect to your database to upload and download information 24 hours a day.

You will have the possibility to choose a private dedicated line for the voice and data transmission from and/or to an important customer, or only to have enough bandwidth if necessary.

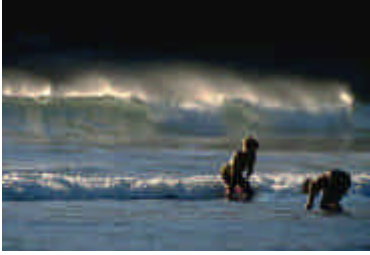

We have also developed services that meet to the specific needs of key areas of the economic arena.

The experience and the innovative approach guarantee you most advanced technologies with flexible and dynamics solutions able to satisfy your currently and future needs in advantageous way.

A DEDICATED EUROPEAN INFRASTRUCTURE

The services destined to the European customers are supplied through the Pan-European network of the Group, entirely managed by JTMC SaT Telecom. Digital connections among the European financial centers allow you the immediate access to point-to-point communications entirely managed and of high quality.

WITH YOU WHEREVER IS YOUR ACTIVITY

Our global network is connected to our international infrastructure, JTMC SaT Network, with amplexness of bandwidth entirely managed with back-up systems that connect the financial centers of the entire planet.

JTMC Global Satellite Switching technology allows an automatic routing in case of breakdown of a circuit, and guarantees the availability of the service offering communications to our customers without solution of continuity, entirely managed end-to-end all over the world and to furnish to domestic level from the JTMC SaT Telecom affiliate companies and partners.

TO UNDERSTAND THE EXPECTATIONS AND OUR PROMISES

JTMC SaT Telecom is constantly engaged to supply the maximum support to its own customers.

We guarantee the standards of service performance arranged.

Systematic quality controls always assure a service to the height of your needs.

Our centers of multi language management of the service, in Europe and in the rest of the World, are operative via internet-on-line 24 hours a day, 365 days per year. Any aspect of the service, from the identification of the breakdowns to information's applications on the billing up to the safety, can be monitored 24 hours a day.

TO SUPPLY THE WAY YOU WORK

The choice is yours about the type of proper assistance for your organization: a sole management center of the service for all of your global communication needs or, if you prefer, more domestic centers.

GROWING YOUR ENTERPRISE

To the dawn of the XXI century, the lasting success of a firm will never depend from its system of global communication and without solution of continuity. The technological progress constantly improves the communications: JTMC SaT Telecom transforms the progress in a winning card for its own customers.

The actual technology allows the simultaneous transmission of voice, data and video on a single platform.

In such way, a great number of information can be sent more quickly.

The reliability and a perfect management guarantees high safety levels, it reduces costs and allows a quick access to the advanced services. The technological progress favors job methodologies more flexible and high levels of productivity.

JTMC SaT Telecom helps its own customers to exploit at the most the advantages of the technological progress with creative services of communication offered by a single supplier.

We will keep on developing new technologies to reach much more high levels of service, molding the future of the communications to offer integrated solutions to our customers able to help them in reaching the most advanced threshold of competitiveness.
